- Outcome of event** : Students got Knowledge to develop the skills.
- Description / Report on Event** : Life Skills can be particularly important during adolescence, which is filled with new feelings, physical and emotional changes, excitement, questions, and difficult decisions. It is also a time when the differences between young men and women become more pronounced and gender norms take a stronger hold in governing young people's aspirations and behaviours. As they move through adolescence, life skills can help young people overcome the challenges of growing up and improve the quality of their young adult lives. Awareness is also created among nmr staff. The girls were also motivated towards this awareness through real life illustrations.
- Feedback / Suggestions** : Most of the students said that it is useful and asked for conduction of more programs in future
