About the Event	The Department of MBA organized an industrial visit to PI Data Center, Mangalagiri, Andhra Pradesh, to provide students with practical exposure to modern data center operations and digital infrastructure. During the visit, students learned about data storage, server management, cloud services, cybersecurity, and network operations. The experts explained how data centers support businesses and government organizations by ensuring secure and uninterrupted digital services.
Objectives	To provide practical knowledge about data center operations. To understand the basics of cloud computing and data storage. To bridge the gap between classroom learning and industry practices.
Outcomes	The visit helped students understand the working of a modern data center and the importance of digital infrastructure in today's business environment. They gained knowledge about server management, cloud technology, and data security, while relating their academic concepts to real-world applications.
Feedback	Students found the industrial visit highly informative and useful. They appreciated the explanations provided by the technical experts and felt that the visit improved their understanding of digital technologies and modern business operations. The overall experience was educational and engaging.
