DevmenIT

DevSparkZ- A DevmenIT Hackathon

Windows 8 App Development Workshop

Introduction:

We, DevmenIT (A Microsoft Partner organization) place technical education as a powerful tool in today's technology-driven and fast-paced world. We believe in creating a world where everyone is attracted to Information Technology & has access to knowledge and learning. We want to provide opportunities which everyone can gain through various Microsoft technologies.

DevmenIT adheres to its mission of providing quality technical education through affordable professional learning services. We provide high quality of technical education through modules based on a specific Technology with a small price tags. We foster group discussions, Hackathons & events to help, create global relationships with our students.

Microsoft certifications & Hackathon:

Every Technology is different and special in its own way. Each has its own distinct strength, dependencies, implementation and set of business objectives. From day one, DevmenIT focuses on streamlining technology learning so that your students have best learning & unique technical expertise to shine through. That way, we ensure your desired outcomes stay at the forefront of every decision.

DevmenIT

| Dreamspark Activation | Training | Hackathon | Certification Exam |

DreamSpark Activation:

DreamSpark is a program from Microsoft through with every student can acquire software's from Microsoft & use them for their better learning of Microsoft Technologies. We, DevmenIT will guide the students in registering themselves for the program & help them get the software for free of cost.

App development Program:

DevmenIT intensively trains the students of the college to learn the app development & also learn programing in C#. At the end of the training students are expected to start with the creation of their own applications. The training program will be held in the college for a period of 1 week which also include MTA certification Training for the students to get the internationally valid Microsoft MTA Certification.

DevmenIT Hackathon:

DevmenIT Hackathon is the platform to showcase the student creativity & implementation of the application with the learning from the app development Program. Hackathon is a 24 Hours app development program where students will form in groups & implement their own idea with the support of the mentors.

Certification Exam:

MTA certification Exam will be conducted after the Hackathon Program. MTA certification is the online Certification Exam for students conducted by Microsoft & Certificate is valid across the Globe.

DevmenIT
